Military Service: Exempt

Professional Summary

Top-ranking graduate in Statistics and Programming from Sohag University, with a strong foundation in data science, programming, and research. Passionate about academic excellence, AI applications in education, and fostering a culture of learning. Experienced in leading sessions, mentoring learners, and delivering technical content with clarity and impact.

Education

Bachelor of Science in Statistics and Computer Science

Sohag University, Sohag, Egypt

June 2025

Grade: Very Good

Department of Mathematical Statistics and Programming

Teaching Experience

Session Lead — Udacity

Jul 2025 – Present

- Deliver live technical sessions and mentorship to learners in data science and programming aged 12 to 17.
- Support students in understanding key concepts and overcoming project challenges.
- Cultivate an engaging, inclusive, and collaborative learning environment.

Teacher Trainer — Giza Systems (for Misr El Kheir Foundation)

Aug 2025 – Present

- Trained teachers at Misr El Kheir schools on the fundamentals of programming and web development.

Research Mentor — Faculty of Science, Sohag University

2023 – Present

- Teach research methodology and academic writing to undergraduate students.
- Conduct workshops on platforms such as ResearchGate and the Egyptian Knowledge Bank.
- Promote research literacy and inquiry-based learning.

Programming Instructor — Sohag Public Library

Jan – Mar 2025

- Taught basic programming to children (ages 8–14) using Scratch and beginner-level Python.

Technical Skills

Languages: Python (Pandas, NumPy, Matplotlib), C#, HTML, CSS, JavaScript

Tools: Jupyter Notebooks, Git, Tableau, MS Office

Teaching Communication: Public Speaking, Workshop Delivery, Simplifying Complex Ideas

Soft Skills: Leadership, Collaboration, Time Management, Creativity

Projects

Customer Churn Prediction (2023) — Built and evaluated a logistic regression model in Python to predict customer churn using real-world data.

Sales Data Analysis (2024) — Visualized sales trends and KPIs using Tableau dashboards for retail insights.

Secure File Transfer System (2025) — Created a secure Python-based app using sockets and RSA encryption.
